

Docket No. AUS920030687US1

ABSTRACT OF THE DISCLOSURE

**METHOD AND APPARATUS FOR TRANSFERRING DATA FROM AN
APPLICATION TO A DESTINATION**

A method, apparatus, and computer instructions for sending content from a first application to a second application. In response to a user input indicating a selection of content for transfer to the second application, the selection of the content is copied to form copied content. The copied content is then automatically sent to the second application without requiring additional user manipulation of the copy content. Additionally, the destination may be another user. In this case, the second application is employed to automatically transfer the copied content to that second user.
